

THE CHICKEN OR THE EGG?

At last, an answer to that age-old oil heating enigma: Which comes first, the oil safety valve or the filter? Introducing the Uni-Saf™ Filter Valve from Suntec, the world leader in oil supply appliances.

The Uni-Saf™ housing combines a high quality oil safety valve with the speed and convenience of a 10-micron spin-on filter. There's even an external vacuum indicator to help you rapidly and accurately troubleshoot. Your installations and service will be Better, Faster and Cheaper. And now both the supply line AND the safety valve are filter-protected.

Which comes first? The answer is simple: The Suntec Uni-Saf™ Filter Valve. Next enigma, please.
